

BUCKET FORKS

FEATURES

- Easy installation on backhoes, wheel loaders and other bucket mounted equipment.
- Adjustable forks spacing to suit width of load.
- Fully forged and heat treated forks for maximum lifting capacity.
- Interchangeable on other machines, simply weld additional "J-Hooks"

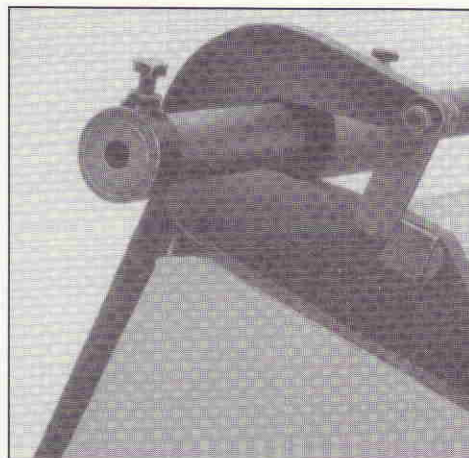

"ON THE MOVE"

Conversion to forklift is accomplished without leaving operator's station

MANY APPLICATIONS

- Kenhar Bucket Kits are versatile to suit many applications including:
 - Bricks • Concrete Block • Sheeting • Lumber • Tiles
 - Roofing • Any other palletized load

SAFETY LOCK

Once the forks have been set in place, they are further secured with an integral safety latch. This keeps the Bucket Kit Locked in place during operation.

EASY INSTALLATION

Kenhar Bucket kits are quick and easy to install. The operator simply drives up to the fork set engaging the forks, then lifts them into place.

KENHAR BUCKET FORK KIT

- 2 Forged Steel Forks
- 3-4 J Hooks (# depends on bucket size)
- Mounting Bar
- All Necessary Hardware

Kenhar has several standard Bucket Kit sizes available. All we need is the capacity of your machine and the size of your bucket (both width and height). Certain restrictions may apply based on bucket design. Additional J Hooks for other machines are also available.
