

The Danish-produced special lawnmower Lynex TX1100, with its simple construction and low center of gravity, works on slopes up to 60 degrees.

The machine is radio controlled and can move within a range of 800 meters. The powerful tracks allow the mower high load capacity and stability both on the slopes and in wetlands. The reliable transmission, combined with powerful cutting gives high performance even under difficult conditions, and the machine is ideal for mowing on steep slopes at water reservoirs and nature reserves.

The Lynex TX1100 has ‘uncomplicated rock – solid engineering’ Powered by a 28 HP Kubota diesel motor this high speed flail cuts grass, scrub and vegetation on banks of up to 60 degrees incline in one pass. The 60” wide flail provides maximum output in the most difficult conditions, and wide rubber tracks, precise weight distribution and the Lynex trade mark ‘low centre of gravity’ ensure smooth running on the steepest slopes without causing damage to the bank surface. The standard ‘Category 1’ three –point linkage allows the flail head to float with maximum travel independently on either side providing maximum cutting ability without grounding out. The Cat 1 linkage and standard PTO drive make the Lynex TX1100 an extremely versatile tool carrier providing power to a range of implements on the flat and on slopes.

Type:	TX 1100
Motor Diesel	28 hp
Slopes up to	60 degrees
Weight	1166 lbs.
Speed forward / reverse	5.5 mph
Turning Radius	0 °
Working Width	60 in.
Height	38 in.
Width	64 in.
Length	67 in.
PTO	1000RPM

Application Areas:

- | | |
|---------------------------------------|--------------------------------|
| Roadside Embankments and Verges | River Walls and Watercourses |
| Reservoir and Lagoon Banks | Monuments and Heritage Sites |
| Bird and Nature Reserves | Golf Courses |
| Water Works and Treatment Plants | Sewage Treatment Plants |
| Railway Embankments | Airports and Airfields |
| Ministry of Defence Sites | Firing Ranges |
| Munitions and Bulk Fuel Installations | All grass banks and revetments |
