

# **SNOWLINE**<sup>®</sup> Disc Spreader P170 - P260

Vestas hydromann

This disc spreader is aimed at the professional user, with focus on the environment and your operating expenses. There are three operation options; manual, electrical and speed dependent. Spread width can be adjusted and

spread symmetry can be moved from right to left. The machine is suitable for a variety of carriers.

The machine can spread from 1-6 metres and spread symmetry can be adjusted.

- Rubber belt supplies material to the disc
- Adjustment of spread symmetry
- Adjustment of spread width
- Adjustment of dosage
- Protective grating on hopper
