## Additional information:

Galvanized and powder-coated steel construction.  
2 pairs of log bolster posts in standard kit (possible to add extra log bolster posts for smaller timber).  
Log bolster posts can be moved on the main frame to adjust the load balance of the trailer.  
Suitable for transporting timber up to 5 metres of length.  
Most of the hydraulic distribution moves through the frame of the trailer, making for good protection against damage.  
Safe unloading of timber provided through hydraulic support legs.  
Complete, illustrated user / operator & CE safety instructions included.
